

viprinet®

Technical Specifications

Frequency	860 - 960 and 1710 - 2170 MHz
Gain	up to 6.3 dBi
Polarisation	Linear
Length	50 cm
Weight	ca. 1 kg
Cable lengths	5 m, 10 m, or 15 m

Suitable for

- UMTS/HSPA/EDGE Hot Plug Module
- UMTS/HSPA+/EDGE Hot Plug Module

PRODUCT INFORMATION

UMTS/3G OUTDOOR ANTENNA

If the UMTS/3G signal is not sufficient despite antenna support, we recommend the use of an outdoor antenna. This robust all band high gain omni-directional antenna covers all cellular frequencies including GPRS/EDGE/3G(HSDPA). It is just 50 cm long and comes with a L-bracket and U-bolts that allows you to fit it on a pole up to 50 mm in diameter or against a wall, balcony, or roof (lightning protection needed). For connecting the antenna to your Multichannel VPN Router, you can choose between cables with a length of 5, 10, or 15 meters. Please keep in mind to always use the shortest possible cable in order to minimize signal quality loss.
