

viprinet®

Technical Specifications

Frequency	1700 - 2200 MHz
Gain (max)	10 dBi (min. 8,5 dBi)
Polarization	Linear (vertical or horizontal)
Nominal input impedance	50 Ohm
Feed power handling	6 W
VSWR	2:1 (max.)
Elevation	38°
Azimuth	54°
Package dimensions	360 x 185 x 80 mm
Cable lengths	5 m, 10 m, or 15 m

Suitable for:

- UMTS/HSPA/EDGE Hot Plug Module
- UMTS/HSPA+/EDGE Hot Plug Module

PRODUCT INFORMATION

UMTS/3G WINDOW ANTENNA

This easy-to-mount window antenna covers the complete UMTS/3G frequency range (but not GSM/GPRS/EDGE) and improves indoor signal quality many times over. It can be mounted to windows with the help of suction pads. Only with metal-coated windows or wire glass, these antennas won't have any effect, here outdoor antennas are recommended. For connecting the antenna to your Multichannel VPN Router, you can choose between cables with a length of 5, 10, or 15 meters. Please keep in mind to always use the shortest possible cable in order to minimize signal quality loss.
