

Press release No. 16/2013

## **A new Internet star is born: Viprinet website relaunched**

Bingen, Germany, 8/23/2013. – With a fair amount of goodwill, our Internet appearance so far seemed a bit outdated. However, enough's enough, so we finally decided to completely overdo our virtual door to the world.

We therefore are especially happy to tell you that our new website is now online. Please feel free to explore [www.viprinet.com](http://www.viprinet.com) and learn about our products and their fields of application.

Besides a more intuitive and a clearer and slimmer structure, we've also refreshed the website's design. We've also changed and enhanced the content. For instance, we're especially proud to now be able to offer you a feature for [comparing routers and hubs](#) with each other.

In addition, we've also developed an [Infographics Generator](#). With this tool, complete network plans with Viprinet infrastructures can be designed by only a few clicks. The Viprinet Infographics Generator helps you set up a network plan with Viprinet components. It contains all router and hub models as well as all module types to create a network plan according to any requirements. Furthermore, you may also depict multiple sites and specify them in regards to their locality (office or industrial building, vehicle, etc). So don't hesitate: Try it today and boost your company network.

We will be very happy to receive any of your compliments, feedback, suggestions and criticism. Just email our marketing team at [marketing@viprinet.com](mailto:marketing@viprinet.com) or call +49 6721 490 30-0.

Press information released on 8/23/2013 – 1,466 characters – print free of charge, please forward a copy.
